## SUMMARY

Excelled as a web developer with 3 years of experience in front-end development, consistently delivering high-quality results; expertise in developing dynamic and responsive web applications, creating reusable code, and implementing responsive designs to contribute to a challenging position in a dynamic organization.

## PROFILE SUMMARY

- Exhibited exceptional problem-solving skills and a strong commitment to **delivering high-quality, responsive user-centric web pages by utilizing Angular, JavaScript, TypeScript, ReactJS, HTML, CSS, and Bootstrap.**
- **Proficient in developing reusable code and executing responsive designs;** possess an in-depth comprehension of architectural design principles and extensive experience in developing reusable, responsive, and functionally robust web components and services for increased efficiency.
- **Strong understanding of the latest coding standards and best practices,** ensuring compliance with accessibility standards and improving web application performance.
- Possess extensive experience in utilizing Git, SQL, Linux, RESTful APIs, Spring, RabbitMQ, Socket Programming, Docker, Jenkins, WordPress, NGINX, and Material UI to enhance web development processes.
- **Skilled in collaborating with multiple stakeholders** to gather requirements, define problem statements, and develop technical solutions that meet business needs.

## EXPERIENCE

### Software Engineer, Addverb

Aug 2022 - current

- Creating, developing, and releasing highly sought-after library of over 14+ reusable, responsive, and functionally robust angular web components and services. [ Product Development, Architectural Design ]
- Improving web application performance by modernizing legacy code and implementing the latest coding standards, resulting in enhanced accessibility and user experience. [ Project Management ]
- Developing comprehensive guidelines and implementing standardized procedures for seamless deployment and interaction with back-end services, fostering effective communication and collaboration across teams.
- Designing various modules for Warehouse Execution System (WES) and Warehouse Management System (WMS), contributing to their seamless functionality.
- Engaging in collaborative partnerships with diverse stakeholders to elicit requirements and devise innovative technical solutions for over 16 projects. [ Client Relationship Management, Requirement Gathering ]
- Rendering valuable guidance and mentorship to junior team members, empowering them to enhance their skills and accomplish their career aspirations. [ Team Management ]

### Software Intern & G.E.T, Addverb

Sep 2020 - Jul 2022

- Collaborated with cross-functional teams to design and implement innovative web applications that resulted in improved user experience and increased customer satisfaction. [ Frontend Development ]
- Implemented and maintained high standards of documentation that resulted in improved project delivery time and enhanced project quality.
- Developed reusable, maintainable, and scalable code using angular concepts and best practices; designed and developed UI for multiple projects.

### Summer Intern, Doordarshan Kendra

Jun 2019 - Jul 2019

- Worked as part of a team to build video tape repository management software; to efficiently store and manage old tapings.
- Wrote structured, tested and readable code while imbibing industry standards for coding practices.

## Personal Projects

### Mock-It, A mock JSON generator application.

Nov 2022 - Jan 2023

- Engineered a node.js server integrated with a user-friendly interface to simulate back-end APIs, streamlining the UI development process.

### Note-It, A user friendly note-taking application.

Jan 2022 - Mar 2022

- Orchestrated the development of an intuitive and user-friendly notes application leveraging Angular. Designed as a fully responsive website, the application employs custom encryption for secure note storage during browsing sessions.

## EDUCATION

### Bachelors of Technology, Computer Science and Engineering

8.2 CGPA

Lovely Professional University

## TECHNICAL SKILLS

**Core: Angular, JavaScript, TypeScript, ReactJS, HTML, CSS, Bootstrap.**

**Technologies: SQL, REST, Spring, RabbitMQ, Socket Programming, Docker, Jenkins, Wordpress, NGINX**
